## Project Design Phase-II Solution Requirements (Functional & Non-functional)

| Date          | 15 October 2022   |
|---------------|---|
| Team ID       | PNT2022TMID16085  |
| Project Name  | Industry-Specific Intelligent Fire Management<br>System |
| Maximum marks | 4 marks   |

## **Functional Requirements:**

Following are the functional requirements of the proposed solution.

| FR No. | Functional Requirement (Epic) | Sub Requirement (Story / Sub-Task)   |
|--------|-------------------------------|--|
| FR-1   | User Registration             | Registration through website or application Registration through Social medias Registration through LinkedIN |
| FR-2   | User Confirmation             | Verification via Email or OTP  |
| FR-3   | User Login                    | Login through website or App using the respective username and password                                      |
| FR-4   | User Access                   | Access the app requirements  |
| FR-5   | User Upload                   | User should be able to upload the data   |
| FR-6   | User Solution                 | Data report should be generated and delivered to user for every 24 hours                                     |
| FR-7   | User Data Sync                | API interface to increase to invoice system  |

## **Non-functional Requirements:**

Following are the non-functional requirements of the proposed solution.

| FR No. | Non-Functional Requirement | Description   |
|--------|----------------------------|---|
| NFR-1  | Usability                  | Usability requirements includes language barriers and localization tasks. Usability can be assessed by Efficiency of use.                 |
| NFR-2  | Security                   | Access permissions for the particular system information may only be changed by the system's data administrator.                          |
| NFR-3  | Reliability                | The database update process must roll back all related updates when any update fails.   |
| NFR-4  | Performance                | The front-page load time must be no more than 2 seconds for users that access the website using an VoLTE mobile connection.               |
| NFR-5  | Availability               | New module deployment must not impact front page, product pages, and check out pages availability and mustn't take longer than one hour.  |
| NFR-6  | Scalability                | We can increase scalability by adding memory, servers, or disk space. On the other hand, we can compress data, use optimizing algorithms. |
